

# Xena Exchange

## PARTNERSHIP OFFER FOR ROBO TRADERS

### WHAT IS XENA EXCHANGE?

Xena Exchange is a digital asset trading platform built by trading professionals with experience at JP Morgan, Deutsche Bank, and Kaspersky Labs and funded by several well-known venture funds. The platform is secured with top banking standards and consistent penetration testing.

For robo traders, we offer **24/7 customer support**, **co-location services in a tier-4 data center**, and **state-of-the-art security embodied in the technology of decentralized accounts**. We provide our clients with both popular and new derivative instruments, a high level of liquidity, and low commissions.

### INSTRUMENTS

Currently, we offer relevant levels of liquidity for the main contract, the XBTUSD perpetual (currently around 6% of the BitMEX liquidity, to be increased to 10% by early November 2019).

Working on:

- Quarterly XBTUSD and ETHUSD futures
- Top 100 Cryptoindex futures
- BTC variance futures
- The ability to deposit and use EUR as collateral and PL currency for all traded instruments

### TIGHT SPREADS

We offer:

- Exchange-level liquidity for all our instruments: no requotes or last looks on the exchange side and limit orders that add liquidity to the book and may be executed with zero spread
- Reliable settlement procedures (indexes used for mark-to-market are based on spot prices from the major cryptocurrency exchanges Bitstamp, Coinbase Pro, and Kraken)
- Average spreads:

Contract	Average spread, USD	Average spread, basis points
XBTUSD Perpetual	0.5	< 0.5
ETHUSD Perpetual	0.05	1.5

### GET FUNDING FROM XENA FUND

- Based on and the backtests of your trading strategy, we can provide you with up to **USD 1 mil** to manage.
- Every month, we will evaluate your strategy and may increase the capital.

### COMMISSIONS

- Commissions start from 0% for both makers and takers, if you trade with your own trading capital.
- 0.025% commission (one-third of that of BitMEX) for takers and **0.025% rebate** for makers, if you get funding from Xena Fund.

### PROFESSIONAL CONDITIONS

- Decentralized accounts (dAccs) that allow you to keep your BTC collateral in a dedicated multisig account (the exchange cannot withdraw the funds without your approval) and transfer it to your account immediately when needed
- Co-location in a tier-4 data center in Luxembourg
- API (WebSockets/REST/FIX)
- 24/7 customer and technical support
- Live chat available during the verification process
- Dedicated account manager
