

ALEXEY SEMICHASTNOV

Chief Product Officer

Experience Highlights

- Xena Exchange's roadmap, functions, product development, and technical news
- Blockchain features and use cases in cryptocurrency exchanges
- Project management, user experience, and business processes in fintech software development

Xena Exchange is an innovative cryptocurrency exchange built by investment-banking professionals that aims to grasp financial institution flows. We provide a higher-returns environment for traders, segregation and liquidity pooling, and digital asset derivatives products (margin-trading, price risk and synthetic exposure, and cryptocurrency indexes and baskets).

Experience Highlights

Alexey Semichastnov has extensive experience building products for financial markets. He kicked off his career at EGAR Technology, building a front-office inventory and reporting platform that was used by traders in the investment departments of major Russian banks. His first major position was the Head of Software Development at a fintech start-up, where he was responsible for all aspects of software development. Throughout the year, he was able to set up software development processes from scratch.

Later, Alexey worked as a technical product manager for several mission-critical applications in the connectivity and clearing & settlement domains at Deutsche Bank. His responsibilities included business analysis and reaching agreements with stakeholders on scope and priorities, as well as project management tasks such as budgeting and planning.

Alexey continued gaining business-development skills at Yandex Tolstoy Startup Camp. There he obtained valuable knowledge about customer development and lean startups, business models, metrics, psychology, and management. This experience helped him reach the next peak in his career: the position of CTO at RAMMFX.

Today, Alexey holds the position of Chief Product Officer at Xena Exchange. His vast experience in project management, product development, and business analysis, along with his deep knowledge of investments and trading fields, has allowed him to become a significant member of the team, responsible for the final look of Xena Exchange.
